

Temperature Converter App :

Create a simple app using Kotlin or java etcto convert temperature form Celsius toFahrenheit and etc.

```
import java.util.Scanner;
```

```
public class TemperatureConverter {  
    public static void main(String[] args) {  
        Scanner input = new Scanner(System.in);  
  
        System.out.println("Temperature Converter");  
        System.out.print("Enter temperature in Celsius: ");  
        double celsius = input.nextDouble();  
  
        // Convert Celsius to Fahrenheit  
        double fahrenheit = (celsius * 9/5) + 32;  
  
        System.out.println("Temperature in Fahrenheit: " + fahrenheit);  
  
        input.close();  
    }  
}
```
